

# Terumo Aortic US Portfolio

## A Company Unlike Any Other

Terumo Aortic was born when Bolton Medical and Vascutek – two pioneers in the aortic repair space – were integrated under global healthcare company, Terumo Corporation.

For over 100 years, Terumo Corporation has contributed to society through healthcare – first in Japan and then worldwide. Vascutek products have been trusted in over 2 million implants in more than 90 countries since 1982, while Bolton Medical has been focused on providing endovascular solutions for aortic disease for more than 15 years.

Our broad portfolio of endovascular and surgical solutions is designed to offer options as individualized as your patient's anatomy.

# Gelweave™ Product Family

Gelweave™ delivers a wide range of solutions for the thoracic and thoracoabdominal aorta.

# Gelweave™ Valsalva Grafts\*

The world's FIRST anatomically designed aortic root graft.

## Features

- ▶ Unique graft design for valve sparing or Bentall procedures<sup>1</sup>
- ▶ Closely matches aortic root anatomy<sup>2</sup>
- ▶ Mimics natural response of the sinuses of Valsalva<sup>3</sup>
- ▶ Potential for: increased valve leaflet longevity<sup>4</sup>
- ▶ Potential for: reduced tension on the coronary artery anastomosis<sup>5</sup>
- ▶ Unique hydrolyzable gelatin impregnation<sup>6</sup>

## Valsalva graft

\* The proximal collar can be used for prosthetic valve attachment or trimmed/inverted for valve sparing procedures according to the surgeon's preference or surgical technique.

# Gelweave™ Straight Grafts

Gelweave™ straight grafts are gelatin sealed, woven polyester grafts indicated for thoracic reconstruction procedures for replacement of diseased segments of the thoracic aorta in cases of aneurysm, dissection or coarctation.

# Gelweave™ Ante-Flo Grafts

Antegrade flow made easy by the side branch may offer minimized circulatory arrest time<sup>7</sup>, lower risk of neurological deficits<sup>8</sup>, maintenance of graft integrity and convenience.

## Features

- ▶ Permits antegrade perfusion via side branch
- ▶ Thoracic aortic applications
- ▶ Unique hydrolyzable gelatin impregnation<sup>6</sup>

# Siena Collared Branched Grafts with Radiopaque Markers

The Siena graft with radiopaque markers is for reconstruction of the aortic vessels & associated Hybrid procedures.

## Features

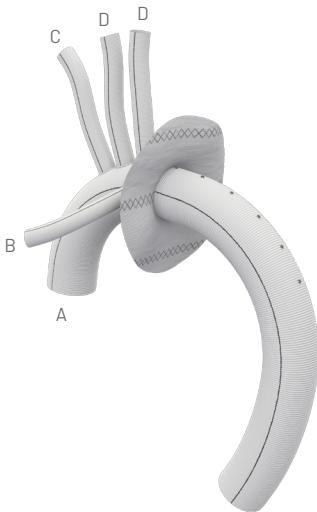

- ▶ Primarily indicated for first stage elephant trunk procedures
- ▶ Radiopaque markers facilitate second stage endovascular repair<sup>9</sup>
- ▶ The collar compensates for diameter mismatch between distal aorta and graft, reducing tension on the distal anastomosis and potential for aneurysm rupture before second stage repair<sup>9</sup>
- ▶ Side branch permits antegrade perfusion

# Gelweave™ Trifurcate Arch Grafts

The design features of the Trifurcate Arch Graft facilitate techniques that may offer:

## Features

- ▶ Shortened hypothermic circulatory arrest time<sup>10</sup>
- ▶ Minimized cerebral ischemia<sup>11</sup>
- ▶ Reduced risk of embolization - No touch technique<sup>11</sup>
- ▶ Minimized adverse outcomes<sup>10</sup>
- ▶ Precise construction of the elephant trunk anastomosis<sup>10</sup>

# Thoraflex™ Hybrid

The world's first multi-branched Frozen Elephant Trunk Device with  
Plexus & Ante-Flo™ configurations for individual arch vessel  
reconstruction or the Island Technique

# Thoraflex™ Hybrid Plexus

Thoraflex Hybrid Plexus facilitates individual arch vessel reconstruction.

## Features

- ▶ Gelweave™ Siena Collar ensures easier and safer anastomosis of the prosthesis to the aorta reducing the haemodynamic traction on the anastomosis<sup>14</sup>
- ▶ 24 to 40mm stent options
- ▶ Radiopaque markers simplify secondary procedures if needed<sup>14</sup>
- ▶ Earlier re-warming<sup>14, 15</sup>, reduced myocardial ischaemia<sup>16</sup>, lower body ischaemia<sup>14, 15</sup> & operating times<sup>17</sup>
- ▶ Compact design with easy deployment system<sup>14</sup>
- ▶ Potential for one-stage operation<sup>18</sup>

# TREO<sup>®</sup> Product Family

TREO<sup>®</sup> provides a wide range of endovascular device configurations to address the abdominal anatomy of each individual patient.

# TREO® Abdominal Stent-Graft System

Every aspect of the TREO® Abdominal Stent-Graft System is engineered for performance. As the only EVAR solution with dual proximal fixation and active leg fixation, TREO® offers the next advancement in abdominal stent-graft solutions.

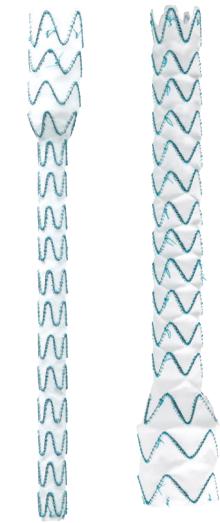

## Features

- ▶ Advanced design
- ▶ Enhanced delivery
- ▶ Secure fixation
- ▶ Optimized procedure

# Relay<sup>®</sup> Product Family

RELAY<sup>®</sup> endovascular devices are designed to help you achieve maximum precision and control in the thoracic aorta.

# Relay®Pro Thoracic Stent-Graft System

## Low Profile without compromise

Relay®Pro offers a low profile system without compromising performance. The platform utilises the same stent design, materials, and foundational Dual Sheath Technology of the proven Relay®Plus.

Select the appropriate device size based on artery outer diameter measurement taken from CT images.

# Relay®Plus Thoracic Stent-Graft System

Inspired by the challenge to create a better solution for the thoracic aorta, Relay®Plus was specifically designed to:

- ▶ Respect the thoracic anatomy
- ▶ Consistently deliver predictable outcomes
- ▶ Provide clinicians with more confidence to treat their patients

The foundational technology in Relay®Plus enables the future of thoracic aorta solutions.

# Aortic Balloon

Aortic modeling balloon designed for exceptional inflation control and the broadest balloon diameter range, up to 50mm.  
It has the lowest available profile.\*

# Lowest available profile balloon\*

## Features

- ▶ 10 French sheath compatible
- ▶ 10mm to 50mm inflation diameters
- ▶ 120cm length for ideal compatibility with TREO® and RELAY® stent-grafts

## Terumo Aortic Balloon Recommended Inflation Volume

Recommended Inflation Volume (cc)	Balloon Diameter (mm)
3	10
6	20
16	30
32	40
44	45
60	50

## Terumo Aortic Balloon Catheter Catalog Number

Catalog Number	Catheter Effective Length (cm)
