TERUMO
Aortic

The Fenestrated TREO[®] Platform

Based on the proven TREO[®] Abdominal Stent-Graft system

Expanded Patient Applicability

- ▶ 3 piece system provides maximum planning flexibility
- ▶ Low profile expands patient applicability (19F OD)

Procedural Accuracy & Efficiency

Cannulate from above for procedural ease and efficiency

Ability to axially and radially reposition graft while partially expanded

90% technical success¹

98% target vessel patency¹
(146/149)

Freedom to position up to 5 fenestrations accommodates a variety of anatomies

Radiopaque markers for improved visualisation and alignment accuracy

“Fenestration position and main body design can be widely customised according to specific preoperative anatomy.”²

1. K. Yeung, Journal of Endovascular Therapy 2024. NOTE: Median Follow Up: 101 days
 2. Next Generation Fenestrated Device: Fenestrated TREO, Mind the Aorta 2024, G. Pratesi

Clinical Case

“Fenestrated TREO facilitates a highly efficient and technically successful procedure, simplifying complex EVAR procedures.”³

Pre-Operative 3D Reconstruction
Juxtarenal AAA - 60mm

Post-Operative 3D Reconstruction

Final Angiogram
