

RELAY[®] PRO

THORACIC STENT-GRAFT SYSTEM

Uniquely Inspired
for Ideal Placement

Empowering Confidence with On-Label Treatment for the Entire Thoracic Aorta

Indications For Use

RelayPro

Indicated for the treatment of thoracic aorta pathologies in adult patients such as

- ▶ Aneurysms
- ▶ Pseudoaneurysms
- ▶ Dissections
- ▶ Penetrating ulcers
- ▶ Intramural hematoma

Competitors*

Indicated for the treatment of descending thoracic aorta pathologies.

100% Technical Success¹
Primary 90%, Assisted Primary 10%

97% Freedom from secondary intervention at one year¹

94% Freedom from device-related major adverse events through 30 days¹

48% of REGENERATION patients treated in Z0-Z3 of the thoracic aorta¹

Preoperative image (A) of 80-year-old man with 91 mm thoracic aortic aneurysm and (B) intraoperative angiogram after innominate artery to left carotid to left subclavian artery bypass and implant of RelayPro

Preoperative image (A) of 75-year old man with 60 mm thoracic aortic aneurysm and (B) postoperative image after right carotid to left carotid to left subclavian artery bypass and implant of RelayPro

Thinking Ahead with On-Label Endovascular Extension

Only On-Label Option to Extend Thoraflex Hybrid

If the lesion requires use of an extension, only a Relay NBS configuration should be used.

33% of FET repairs need a future downstream intervention²

“Distal stent-graft extension following the frozen elephant trunk procedure is a good and safe treatment option in patients with thoracic aorta diseases.”³
